

## Jiandie Lin Lab

We investigate the mechanisms that regulate nutrient and energy metabolism, and how they become reprogrammed in obesity and metabolic diseases.

Coordinator:  
Zhimin Chen, Lab Manager,  
[czhimin@umich.edu](mailto:czhimin@umich.edu)

The Lin Lab focuses on elucidating how the metabolic properties of tissues are specified during development and reprogrammed in disease, dissecting the genetic and epigenetic mechanisms of metabolic regulation, and discovering novel secreted factors in systemic metabolic crosstalk.

## Weiping Zou Lab (BSRB Room 5428 – 5478, fifth floor)

Contact:

Weimin Wang, PhD  
Research Lab Specialist,  
[weiminw@umich.edu](mailto:weiminw@umich.edu)

Houjun Xia, PhD  
Research Fellow, [xiah@umich.edu](mailto:xiah@umich.edu)

The research interests of the Zou lab are in tumor immunopathology and immunotherapy, with an emphasis on the cross-talk among immune cell subsets, stromal cells and tumor cells in the tumor microenvironment, and its impact on tumor immunity, tolerance and therapy.
